

# ENFORCER® Sensor

## SLI® 259A Dual-Stage Microwave Sensor

The SLI 259A detects the movement of mass through a protected area (i.e. an arm reaching into a car or a door being opened). The SLI 259A has dual-zone protection. It combines both perimeter pre-intrusion warning and instant interior trigger protection. It does this by transmitting and receiving a high-frequency RF signal. When an object moving towards the vehicle is detected, the high-frequency RF signal will change. This change will cause the microwave sensor to send a trigger signal to the alarm.

### Features

- ▶ Ideal for vehicles with cloth or open tops, or open sunroofs.
- ▶ Dual-stage protection — Chirps siren if exterior zone violated (someone gets too close to car), triggers alarm if interior zone is violated (break-in or vandalism attempt).
- ▶ Plugs directly into any ENFORCER alarm. Easily connects to non-ENFORCER alarms.
- ▶ Separate microfine sensitivity adjustment of interior and exterior zones for excellent zone separation.
- ▶ Built-in LED indicates interior and exterior zone status.

### Example of installing the SLI 259A with an ENFORCER® Alarm and SS-052B Shock Sensor

### SLI 259A Specifications

No. of zones	2
Trigger output	Transistor ground
Pre-alert output	Transistor ground
LED	Tri-color
LED status indication	Power-up, incorrectly connected, sensitivity, internal and external zone trigger status
No. of sensitivity adjustment pods	2
Programmable external protection?	Triggers the alarm if 4 pre-intrusion alerts occur within 15 sec.
