

QUALITY & VARIETY

SECO-LARM® Offers a Wide Variety of High-quality Magnetic Contacts

What you don't see is what you get! SECO-LARM® offers patented reed switches with unique deactivated rhodium plating. Note the unique glue and epoxy combination. Observe the gold-plated terminals. Note the advanced engineering and detailed quality control. Understand how SECO-LARM® can offer the most reliable contact available anywhere, especially at the lower voltage levels normally used in security systems.*

CONTACT FEATURES:*

- Gold-plated terminals for long life & reliability
- Soft glue and epoxy bedding compound for cushioning of reed switch against shock and pressure during installation and temperature changes.
- Patented reed switches using rare-earth metals with gold under-plating for superior performance
- Tested to UL 634 standard – burglar protection, not electrical
- Rare-Earth magnets for superior gaps

**Contacts may not have all features*
