

# ENFORCER®

## Take the Guesswork out of Troubleshooting

Correct DC  
Polarity

Reverse DC  
Polarity

AC Voltage

No Power

### Illuminated Power Connectors

SECO-LARM's Illuminated Power Connectors make troubleshooting CCTV or other 12VDC or 24VAC equipment easy. A quick glance at the built-in multi-colored LED prevents damage to the equipment by warning of incorrect voltage or polarity. Available as either a plug or jack, the Illuminated Power Connectors are perfect for nearly every installation, including CCTV, Access Control or any other low voltage (5-30 VAC/VDC) device.

The Illuminated Power Connectors can be mounted permanently, or carried from job to job as a temporary test light instead of bulky test meters. Just plug it in and instantly know whether there is AC or DC power, or even no power. It also lights to show when DC polarity is correct or reversed. A blue light indicates DC power and correct polarity. A red light indicates DC power with reversed polarity. A purple light indicates AC power. And no light indicates no power.

## SECO-LARM®

CA-1610-3FLO  
DC Jack with LED, 3ft. Wire

CA-1510-3FLO  
DC Plug with LED, 3ft. Wire

CA-1615-06LQ  
TEST CABLE  
DC Jack to DC Plug  
with LED, 6" Wire

U.S.A. and international Patents pending.

Extensive line of security products available.
