

# Problem Solvers

SECO-LARM has the solutions for common installation problems.

## Multi-Purpose 12VDC Tester

The ST-BT01Q Performs the following tests:  
Voltage Test, Battery Load Test, Voltage Drop Test, Polarity Test, PTC Fuse Test.

## HDMI Extender

Break free from expensive HDMI cables! With the MVE-AH010Q HDMI over Cat5 Extender, HDTV signals can now be transmitted up to 160' over low-cost Cat5 cable.

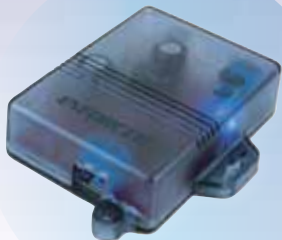

## Ground Loop Isolator

Image Problems?  
Connecting the VG-1C12AQ Ground Loop Isolator in-line with a camera can reduce cross talk and picture tearing and rolling by reducing interference.

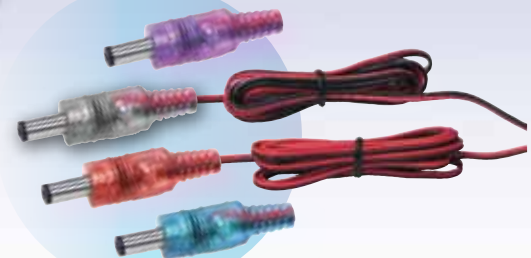

## Wireless RTE Plates

Cement and brick walls are no match for the SD-8 Series of Wireless RF RTE plates. Easily connect to a locking device without wires.

## Voltage Boosters & Converters

Easily overcome problems associated with insufficient or incorrect voltage. The ST-LA105-TTQ Voltage Converter allows older systems running AC power to use DC powered devices, and the ST-HB105-TTQ Voltage Booster increases DC voltage at a device with insufficient power.

## Illuminated Power Connectors

Troubleshooting has never been easier! Just by looking at the multi-colored LED, the type of voltage and polarity can be seen.
