SECO-LARM Introduces Three New DC Power Supplies for CCTV Cameras and Accessories

IRVINE, CALIF., September 4, 2003 - SECO-LARM introduces the latest in its line of video cameras and accessories: a series of CCTV DC power supplies.

ENFORCER CCTV DC power supplies centralize the power sources for multiple DC-powered CCTV cameras and/or CCTV accessories. The power input, power transformer, DC converter and all fused power outputs are enclosed in one heavy-duty, easy-to-install enclosure. As a result, an ENFORCER CCTV power supply can replace nine or more individual power sources.

The new power supplies are output-voltage adjustable with a potentiometer to compensate for voltage drop (12.0~15.1VDC), individually fused with resettable Positive Temperature Coefficient (PTC)-type output fuses rated for 1.1 Amps @ 250VAC, and have individual red LED status indicators for each output. There is a main power switch to turn on/off power to outputs. The UL-approved power transformer uses selectable 120VAC or 240VAC @ 60Hz at a total power rating of 2.5 Amps for the 4-output power supply, 4.0 Amps for the 9-output version and 6.0 Amps for the 16-output. A spare fuse and a 6-foot power cord are included.

The case is heavy-duty steel to protect the power connections, with a removable steel cover for easy access, ventilation holes to prevent heat build-up, and an AC terminal block for easy connection from transformer to 6-foot power cord.

Model numbers for the new power supplies are as follows:

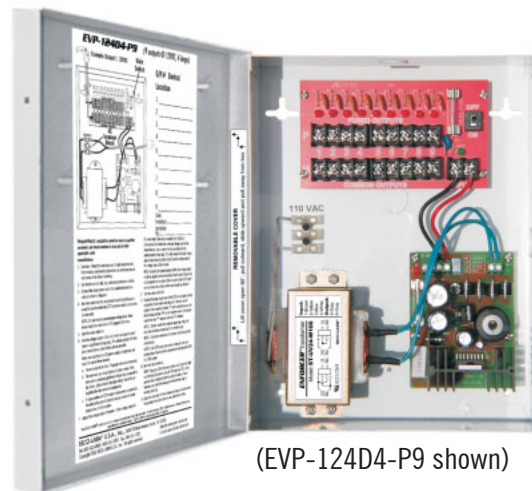

EVP-124D2P4 (4 outputs @12VDC, 2.5 Amps)

EVP-124D4-P9 (9 outputs @ 12VDC, 4.0 Amps)

EVP-124D6-P16 (16 outputs @ 12VDC, 6.0 Amps)

The EVP-124D2P4 and EVP-124D4-P9 are both currently available from SECO-LARM, while the EVP-124D6-P16 will be available soon.

The EVP-124D2P4 and EVP-124D4-P9 use a 9-7/8" x 7-1/2" x 3-1/2" case, while the EVP-124D8-P16 uses a larger 12" x 12-1/2" x 3-1/2" case.
