## **SECO-LARM Introduces the New E-964-D390Q Multi-Frequency Twin Photobeam Detector**

IRVINE, CALIF., June 10, 2008 - SECO-LARM is now shipping the ENFORCER E-964-D390Q Multi-Frequency Twin Photobeam Detector. Featuring four selectable channel frequencies, the Twin Photobeam Detector can provide enhanced perimeter protection by reducing crosstalk between multiple units. Installation is quick and easy thanks to a built-in laser-alignment system.

The E-964-D390Q has a range of up to 390' (120m) while twin beams provide reliable perimeter security, minimizing false alarms from falling leaves, birds etc. The detector features lensed optics to reinforce beam strength and provide excellent immunity to false alarms due to rain, snow mist and so on.

SECO-LARM offers a complete line of ENFORCER Twin-Photobeam Detectors: The E-960-D90Q features a range up to 90' (30m) outdoors, the E-960-D190Q features a range up to 190' (60m) outdoors, and the E-960-D290Q features a range up to 290' (90m) outdoors

(High-Resolution Photos Available)
