## **SECO-LARM Introduces the New EVT-SBP-GQ Passive VGA Balun**

IRVINE, CALIF., November 15, 2007 - SECO-LARM is now shipping its new EVT-SBP-GQ Passive VGA Balun as a new addition to its extensive line of CCTV products.

The EVT-SBP-GQ is for connecting a PC, digital video recorder, or video splitter to a VGA monitor at distances of up to 450 feet (137m) away. The connection is done via low-cost Cat 5 or Cat 5e shielded twisted-pair (STP) cable with shielded RJ-45 connectors. This allows the monitors to be easily installed on a security professional's desk while the video devices are locked securely in a separate room.

SECO-LARM's Passive VGA Balun provides the following features:

- Low-cost and lightweight compared to VGA cable
- Transmits VGA signals from personal computers, digital video recorders, video splitters, or similar video sources with a VGA output to CRT or LCD monitors or VGA projectors.
- Extends VGA range to 450 feet (137m) @ 640 x 480 resolution.
- Works with video signals of up to 1280 x 1024 pixel resolution.
- Uses Cat 5 or Cat 5e shielded twisted pair instead of heavier, more expensive VGA cables.
- Sold in pairs: One for the video source, one for the monitor.
- Passive operation, no power required.
- Small size, only 2-1/8" x 1-3/16" x 1" (54 x 30 x 25mm).

(High-Resolution  
Photos Available)

The new Passive VGA Balun is just one of SECO-LARM's wide selection of alarms and accessories for the security and electronics industries. For more information about these products or any of SECO-LARM's full line of residential and commercial security systems and accessories, or to request our latest catalog, please contact the SECO-LARM Sales Department (949) 261-2999 (California)
