Now Available: SECO-LARM's IR Color Dome Camera with special anti-reflective coating

IRVINE, CALIF., September 20, 2005 - SECO-LARM U.S.A, Inc. is now offering an infrared dome CCTV camera to securely monitor the tightest spaces under a wide range of illumination. This camera is protected against attack by a tough all-metal enclosure and a high-impact smoked plastic dome, with a special coating to reduce IR reflection from the six LEDs. Features include a Sony 1/3" CCD chip with 380 TV lines of resolution, Auto Electronic Shutter (AES), Auto Gain Control (AGC), Back Light Compensation, and Auto White Balance.

Mounted at any angle on any flat ceiling to satisfy a wide range of security needs, use these cameras to keep an eye on a child or pet, or to watch your yard or office.

Six High-Intensity infrared LEDs automatically trigger at 10 LUX and illuminate up to 15 Meters, allowing the camera to operate in total darkness.

The camera comes with a fixed 4.3 mm lens, and has auto electronic shutter (AES) control from 1/60-second to 1/100,000-second. The signal-to-noise (S/N) ration is greater than 48dB. At only 3⁷/₈ inches in diameter and 3¹/₈ inches in height (98 x 80 mm), it is easily installed in many locations, using 12VDC, and consuming only 100mA with the LEDs off or 280mA with LEDs on.

The new IR dome CCTV camera is currently shipping to authorized SECO-LARM distributors and dealers.

This dome camera is just a one of SECO-LARM's wide selection of security equipment and accessories for the security and electronics industries. For more information about the IR color dome camera, or on SECO-LARM's complete lines of video security systems and accessories, or to request our latest catalog, please contact:
