Now Available: SECO-LARM's IR Color Vandal Resistant Dome Camera with special anti-reflective coating

Provides attractive, unobtrusive protection in almost any environment for any vehicle, indoor or outdoor installation.

IRVINE, CALIF., November 11, 2004 - SECO-LARM U.S.A, Inc. is now offering an infrared dome CCTV camera to securely monitor the tightest spaces under a wide range of illumination and environmental conditions. This camera is protected against nearly any kind of attack by a tough all-metal enclosure and a high-impact smoked plastic dome, with a special coating to reduce IR reflection from the LEDs. Features include a Sony 1/3" CCD chip with 380 TV lines of resolution, Auto Electronic Shutter (AES), Auto Gain Control (AGC), Back Light Compensation, and Auto White Balance.

Mounted at any angle on any flat ceiling to satisfy a wide range of automotive and indoor/outdoor security needs, use these cameras for back-up vision where your mirror can't reach, or to keep an eye on a child or pet in the rear area of your RV, or to watch your yard or office.

Six ALGaInP High-Intensity infrared LEDs automatically trigger at 10 LUX and illuminate up to 15 Meters, allowing the camera to operate in total darkness.

The camera comes with a fixed 4mm lens, and has auto electronic shutter (AES) control from 1/60-second to 1/100,000-second. The signal-to-noise (S/N) ration is greater than 48dB. At only 3.5 inches in diameter and 3.25 inches in height (88 x 83 mm), it is easily installed in many locations, using 12VDC, and consuming only 100mA with the LEDs off or 280mA with LEDs on.

The new IR dome CCTV camera is currently shipping to authorized SECO-LARM distributors and dealers.

This dome camera is just a one of SECO-LARM's wide selection of security equipment and accessories for the security and electronics industries. For more information about the IR color dome camera, or on SECO-LARM's complete lines of video security systems and accessories, or to request our latest catalog, please contact:
