SECO-LARM Introduces 2 Series of Weatherproof Stand-Alone Keypads

IRVINE, CALIF., October 21, 2010. SECO-LARM is introducing two series of weatherproof stand-alone keypads - the SK-2323 Mullion-Style Weatherproof Keypad series and the SK-1323 Sealed-Housing Weatherproof Keypad series.

Both series of keypad come with two built-in Form C relay outputs rated 1A@30VDC, each with a programmable output time from 1~99 seconds or toggle. Output #1 can have a card or code programmed for each user. Each keypad has two egress inputs, one door sensor input, and an optical tamper sensor for added security. The keypads are weatherproof (IP65) with epoxied circuitry for outdoor use. Both series are available with an optional built-in 125kHz proximity card reader.

The SK-2323 series has two models available: The SK-2323-SDQ is a basic Mullion-Style Weatherproof Keypad. The SK-2323-SPQ comes equipped with a proximity card reader.

The SK-1323 series also has two models available: The SK-1323-SDQ is a basic Sealed-Housing Weatherproof Keypad. The SK-1323-SPQ comes equipped with a proximity card reader.
