## **SECO-LARM Introduces the New HDMI Line of ENFORCER Products**

IRVINE, CALIF., April 28, 2009 – SECO-LARM is now shipping the new HDMI Line of ENFORCER Products including the MVE-AH010Q HDMI over Cat5e/6. The MVE-AH010Q extends the range HDMI signals farther than traditional HDMI cables, up to 196' (60m) at full 1080p HD resolution. A transmitter and receiver are included in each set, amplifying and duplicating HDMI signals for superior picture and sound quality. By using low-cost Cat5e/6 cable instead of heavier, less flexible HDMI cable, installations for HDMI equipment are now more cost-effective and efficient than before.

Featuring an included 5VDC power adapter, the receiver is actively powered to provide a stronger, clearer signal at longer distances than HDMI cable alone. The MVE-AH010Q can transmit a 480i signal up to 328' (100m), a distance that would cost significantly more if using HDMI cables. Formats that are supported include a maximum 1080p/1080i and minimum 480p/480i.
