## **SECO-LARM Introduces the New SK-917T4J 4-CHANNEL TRANSMITTER**

SECO-LARM introduces the latest in SECO-LARM's line of code-hopping transmitters utilizing SECO-LARM's proprietary CODEBUMP™ technology, which defeats "Code Grabbers" by continuously changing the transmitter's code (18 quintillion possible codes) every time a button is pressed. This hot new four-channel RF transmitter, the SK-917T4J, is attractive (like no other remote on the market today) and ultra thin (just 5/16"). It fits easily in any pocket, yet boasts a range of up to 200 feet or up to 1,000 feet when used with a receiver utilizing an extended range antenna.

In addition to great styling and performance, the SK-917T4J is extremely durable, with rubber buttons to eliminate damage caused by electrostatic discharge and increase water resistance, plus a concealed "Magic LED" that only appears when buttons are pressed. Gold-plated battery chips and contact points also extend the work life and reliability of the transmitter.

The SK-917T4J is also easy to use, with separate buttons for different functions, such as lock, unlock, panic and auxiliary output when used with matching SECO-LARM vehicle alarm systems, e.g., the ENFORCER 640Plus, which comes standard with two SK-917T4J transmitters.

The SK-917T4J is just one of **SECO-LARM's** wide selection of alarms and accessories for the security and electronics industries. For more information about the SK-917T4J or any of **SECO-LARM's** full line of vehicle security systems and accessories, or to request our latest catalog, please contact the **SECO-LARM** Sales Department (949) 261-2999 (California), fax (949) 261-7326 or (800) 662-0800, or visit us on the Web at **[seco-larm.com](http://seco-larm.com)**.
