## **SK-919TT1S-BU 1-Channel Dip-Switch Programmable RF Transmitter**

SECO-LARM introduces its hot new RF transmitter (the SK-919TT1S-BU) with dip-switch programming and 59,049 available codes. The DIP switch coding is perfect for applications requiring large numbers of identical codes (block coding). DIP switch coding also allows for simple matching of a transmitter already in use.

Use the SK-919TT1S-BU one-button transmitter in place of keypads and key locks for wireless RF remote control of alarm control panels, garage doors, house lights or other devices.

The SK-919TT1S-BU offers a slimline design (measures just 2" x 1.5" x .6") and a range of up to 500 feet. The frequency is 315MHz (433.92 Mhz also available by request). It includes a flashing LED to indicate transmission, a 12VDC alkaline battery, and a chrome keychain ring. The SK-919TT1S-BU replaces the discontinued SK-919TDIS-U. It is compatible with all SECO-LARM 1, 2, and 4-channel RF Receivers. For easy integration into existing systems, it is also compatible with various pre-coded transmitters, such as SECO-LARM's SK-919TD1S-UP.

The **SK-919TT1S-BU** is just one of **SECO-LARM's** wide selection of alarms and accessories for the security and electronics industries. For more information about the **SK-919TT1S-BU** or any of **SECO-LARM's** full line of residential and commercial security systems and accessories, or to request our latest catalog, please contact the **SECO-LARM** Sales Department (949) 261-2999 (California), fax (949) 261-7326 or (800) 662-0800, or visit us on the Web at **[seco-larm.com](http://seco-larm.com)**.
