## **SECO-LARM VIDEO BALUN, FOR CONNECTING CCTV COMPONENTS**

**Use to easily, quickly and cheaply connect multiple CCTV devices over long distances while preserving signal quality.**

IRVINE, CALIF., June 25, 2004 - SECO-LARM U.S.A, Inc. is now offering a video balun to its CCTV customers. The EVT-PB1 is the quick, low-cost way to connect CCTV cameras to a monitor, multiplexer, or video recorder at up to 1,950 feet away for monochrome or 1,300 feet away for color. A wide range of video formats is supported, including RS170, NTSC, PAL, SECAM and CCIR, at frequencies ranging from DC to 5Mhz.

The EVT-PB1 allows a CCTV camera's video signal to be transmitted over low-cost CAT5 unshielded twisted pair (UTP) cable instead of costly coax cable. A pair of video baluns provides standard BNC to BNC connections to components. Outstanding features of the EVT-PB1 include its small size ( $2\frac{3}{4}'' \times \frac{3}{4}'' \times \frac{5}{8}''$ ) and its quick-connect screwless terminal blocks for the twisted pair wire connections, making hookup simple.

The new video balun is currently shipping to authorized SECO-LARM customers.

The EVT-PB1 Video Balun is just one of SECO-LARM's wide selection of accessories for the CCTV, RF, security and electronics industries. For more information about the video balun or any of SECO-LARM's full line of CCTV, RF, residential and commercial security systems and accessories, or to request our latest catalog, please contact the SECO-LARM Sales Department (949) 261-2999 (California), fax (949) 261-7326 or (800) 662-0800, or visit us on the Web at [seco-larm.com](http://seco-larm.com).
