SECO-LARM introduces the SL-1311-MA & SL-1302-MA High-Intensity LED Modules

IRVINE, CALIF., October 21, 2010. SECO-LARM now has available for immediate shipment two new High-Intensity LED Modules. The SL-1311-MA is a rectangular module with 4 high-intensity 1-Watt LEDs. The SL-1302-MA is a disk module with 52 LEDs. Both models are available in Clear, Red, Blue, and Amber.

Both LED modules have 19 built-in programmable flash patterns including steady on, all LEDs flashing together, and alternating flashing. They have a long operating life of up to 100,000 hours of continuous use. Up to 15 units can be synchronized to flash simultaneously or alternately, and a non-volatile memory recalls the last flash pattern used at power-up. Both models have a multi-voltage input from 10~30 VDC.

SECO-LARM High-Intensity LED modules are weatherproof (IP66) and vibration-resistant for both indoor or outdoor use, making them ideal for several applications, including visual indication for security systems, caution or hazard lighting, police and security vehicles, fire trucks, construction vehicles, ambulances, and much more.
