

ENFORCER®

Touchkey Immobilizer with master coding for preloads*

Model: SLI® 760FP-H1B

The SLI 760FP-H1B Touchkey Immobilizer combines high security with the convenience of completely passive arming. To arm, turn off the ignition. 30 seconds later, up to two of the car's electrical circuits are disabled. To disarm the system, insert the Touchkey momentarily into the Touchkey receptacle. You now have 30 seconds to start your vehicle or the Immobilizer will rearm.

The SLI 760FP-H1B was designed with car dealers in mind. Master Touchkeys are available with the dealer's own unique code so salespeople can control and demo any car on the lot. But when the car is sold and the User Touchkeys are learned, the Master Touchkey is automatically deleted!

KEY FEATURES

- Code learning, with Master Touchkey Controllers:
 - Hundreds of master codes available. Use a different master for each dealership.
 - Either the Master Touchkey or the User Touchkey operates the immobilizer. Master and User Touchkeys cannot operate the immobilizer at the same time.
 - CodeWash™ deletes previous codes during code learning to prevent use of lost or stolen Touchkeys.
- Two Touchkeys supplied with each unit:
 - Code learn up to 8 Touchkeys.
 - No battery required.
 - EEPROM stores codes up to 1 year if power lost.
 - Millions of possible codes.
- Handsomely crafted backlit receptacle:
 - Backlit so easy to find and insert Touchkey at night.
 - Spring-loaded to ensure easy and proper contact.
- Immobilization of up to two electrical circuits.
- Fully automatic arming 30 seconds after ignition is turned off.
- Unique security code for valet/override mode if Touchkey is lost or stolen.
- Flashing status LED acts as a strong deterrent and as background lighting for the Touchkey receptacle. Indicates immobilizer armed, disarmed, code learning mode and valet override.
- Mini tamper-proof housing, with all black wires.

* When sold for car dealer use, SLI-760FP-H1B is sold under a different name. Contact SECO-LARM for details.

USER TOUCHKEY Model: SLI 760FPK

Two included with each unit. Given to the consumer once the vehicle is sold.

MASTER TOUCHKEY

Model: SLI 760FPM

Red in color, with the words "DEALER USE ONLY" engraved in the plastic. All Master Touchkeys coded the same at the dealership lot. Master deleted once User coded in.

DEALER DELETE PLUG

Model: SLI 760DDP

Plugs into wire harness if immobilizer needs to be removed from the car.

HANDSOMELY CRAFTED BACKLIT RECEPTACLE

Backlit to make receptacle easy to find and insert Touchkey at night. Spring-loaded prongs assure that the Touchkey is inserted properly.

LED HOLDER

Model: SLI 760LEDH

Use to mount LED under dash. Eliminates need to drill hole in dash. Included with each unit.

ACCESSORY PACK

Model: SLI 760FPAP

Extra accessory packs. Use to make complete unit when only brain is removed from vehicle.
