SECO-LARM Introduces the SLI 762FP-ISS Touchkey Immobilizer

IRVINE, CALIF., May 6, 2010 - SECO-LARM is now shipping the SLI 762FP-ISS Touchkey Immobilizer. The Touchkey Immobilizer combines high security with completely passive arming. To arm, turn off the ignition. 30 seconds later, up to 2 of the car's electrical circuits (e.g. starter, ignition, fuel pump) will be disabled. To disarm the system for 30 seconds, insert the Touchkey into the Touchkey Receptacle.

The SLI 762FP-ISS comes equipped with 2 built-in 30-Amp relays. The Touchkey Receptacle is attractively designed and backlit for easy nighttime use. All wires are black to prevent tampering. Code information is stored in non-volatile EEPROM memory to protect data in case of power loss and one Touchkey can control multiple vehicles. Each unit comes with 2 Touchkeys.
